

CLUB NET.....

To quote Micheal Caine: "Not many people know this".

There is a SEARS Net on 2 metres at 8 pm each Tuesday. So join in. The frequency is 145.500 MHz.

FINAL FINAL.....

My first New Year Resolution will be to stop moaning about lack of input from members for NEWSFLASH. But it is still 1986 so here I go again.

Apart from the Club calender (thanks Alan), not a single item has been forthcoming since the last NEWSFLASH. I am sure that everyone has at least one hint, tip or anecdote to contribute to the newsletter. Help me keep my New Year resolution intact.

* Merry Christmas and A Happy New Year from the SEARS committee *

STOP PRESS.....

Winners in the 1986 SEARS Construction Contest were presented with their trophies at the Christmas 'knees-up' last Wednesday.

Congratulations to Dave 64UVJ, who won the trophy in the Home-Brew section with his 20m transverter. And well done Stuart G0ASN. His 50 MHz Transverter won him the cup for the best Kit-Built project.

A special trophy was presented to Dean Swift. He rounded off a very successful week, in which he came top of the form in Science and passed his First Aid exam, with the prize for his one-transistor portable radio.

And special thanks to Betty and Dennis for taking charge of the catering at the Christmas social. We all went home well fed after a very pleasant evening.
